Event Configuration

Network Discovery

Network Discovery Configuration

General

General network discovery settings

Disabled

Passive only (using ARP and routing information)

Active and passive

Default SNMP community string

public

Filter

Discovery filter

No filtering

Custom script

Automatically generated script with following rules

Accept node if it has NetXMS agent

Accept node if it has SNMP agent

Accept node if it is within given range or subnet

Active Discovery Targets

Subnets and address ranges to be scanned during active discovery

192.168.1.0/255.255.255.0

192.168.11.0/255.255.255.0

192.168.12.0/255.255.255.0

192.168.13.0/255.255.255.0

192.168.14.0/255.255.255.0

192.168.15.0/255.255.255.0
